

Data and Reporting: Carevive

These resources from Carevive address how ePRO reports work within the system.

The [On-Demand Platform Reports](#) checklist provides step-by-step guidance (with screenshots) demonstrating how to access on-demand platform reports for patient monitoring. It is useful for generating reports related to ePROs, NCCN distress thermometer, and other workflow metrics.

The publication Carevive Reports Overview outlines how ePRO reports work in the Carevive system including the Distress Report and PhQ9 Report; patient monitoring; an ePRO survey compliance report; alerts report; care plan delivery reports; survivorship care planning reports; treatment care planning reports; and distress and symptom management care plan reports.

Use the links provided below to explore Carevive checklists on the following topics:
