

# Comprehensive Solutions for Connected Care

Navigating Care's digital health platform is designed specifically for oncology clinics to enhance patient engagement and streamline care management.

At Piedmont Cancer Institute, we have been on the Navigating Care platform for over 10 years.

We have seen improved patient outcomes due to seamless communication and the ability to identify symptoms before they become more significant. Patients love the ease of accessing and using the patient portal to communicate with their care teams and to attain educational materials about their disease and therapies."

Eric D. Mininberg, MD  
Piedmont Cancer Institute

## FOR PATIENTS:

- Easy, mobile-friendly portal to check test results, message with the care team, and access personalized education.
- Health Tracker monitors side effects and medication adherence, catching issues early for better outcomes.

## FOR CARE TEAMS:

- Centralized patient communication to streamline workflows.
- Triage system highlights high-priority cases for focused care.
- Seamless EMR integration reduces administrative burden and supports value-based care.

## PATIENT PORTAL

- Provides patients with 24x7 access to their health information, including appointments, test results, medications, and on-demand symptom reporting
- Secure 2-way communication between care team and patients
- High quality, personalized education helps increase health literacy, symptom management and treatment duration

## DIGITAL TRIAGE

- Integrates seamlessly into existing workflows to support accurate and efficient documentation.
- Improves efficiency through dynamic filtering and prioritization, improving responsiveness to patients.
- Optimizes care coordination with an intuitive and centralized staff interface to effectively manage patient interactions.

## HEALTH TRACKER

- Proactive oral adherence & side-effect reporting while patients are on treatment, enabling timely interventions
- Easily deploy validated instruments to assess patients for distress, depression, pain, oral adherence and side-effects
- Empower patients to stay on treatment with medication reminders send digital at-home care instructions as needed

## PATIENT EDUCATION

- Navigating Care's patient portal provides curated education to patients, automated based on EMR events.
- Educated patients better manage side effects and communicate concerns, leading to:
  - Improved adherence and symptom management
  - Extended time on treatment—on average, two additional cycles for IV immunotherapy and similar benefits for oral agents
